

SONY PLAYSTATION

Age Restrictions

You can set up child accounts to only allow age appropriate content. On PS 5, parents have the ability to deny or allow their children to override restrictions.

Time Limits

You can customise playtime settings to limit how long your child can play on the device each day.

Communication

Parents have the ability to restrict chat, messaging or content sharing with other players via the Playstation Network.

Web Browser

PS 4 and PS 5 consoles have a built in web browser and you can disable access so they do not view unsuitable websites or social media.

Spending Limits

Purchases made by your child's account will be charged to the Family Managers wallet. You can control how much they spend by setting a limit.

Passcode Protection

Parents can enable a passcode to prevent changes to the parental control settings or allow a new account to be set up.
